

# Instruction

## Adaption to V23 & V29 sockets to fit TH 35-15 rail

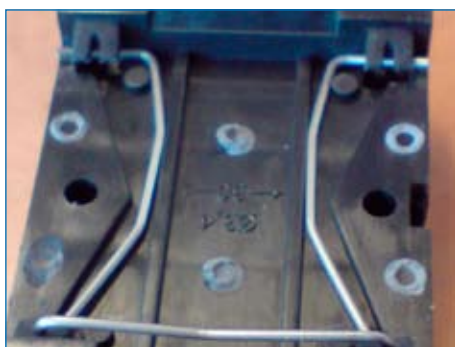

The new V23 & V29 sockets are equipped with 6 small pillars. The purpose of these pillars is to offer extra stability when the socket is wall mounted, but are unnecessary when the socket is mounted on a TH 35-15 rail.

The pillars will have to be removed before the socket will fit on a TH 35-15 rail.

Remove the pillars by a sideway twisting movement using (regular) pliers.

When the pillars are removed white spots will remain on the socket. This is a normal phenomenon and does not have any effect on the strength of the socket.
